Velo Verde e-bike care guide

Charge the battery at room temperature and never below 0 degrees Celsius.
Store the battery at 30 to 60 percent charge if the bike is not used for more than a month.
Clean the bike with a damp cloth. Never use a pressure washer on the motor or the display.
Check the tyre pressure every week. City tyres need 3.5 to 4.5 bar.
Bring the e-bike in for a service every 2000 km or once a year.
